

PROFILE		
• Second-year B.Tech student in Computer Science and Engineering at Ramdeobaba University. I am highly passionate about technology, innovation, and building practical solutions through programming and software development • I have worked on multiple projects in the fields of Artificial Intelligence and Web Development, where I have applied problem-solving, analytical thinking, and development skills to create efficient and user-focused solutions. • I also have knowledge of modern web technologies and development frameworks, along with hands-on experience gained through a web development internship in MITTAL INDUSTRIES. • Throughout my academic journey, I have continuously explored new technologies, developed technical projects, and enhanced my skills in designing, developing, and implementing software-based solutions. • Designed, developed, and implemented dynamic web projects using modern frontend and database technologies • Proficient in creating modern and responsive websites using AI-powered and design tools such as Figma and WordPress, along with other web development platforms. • Participated in multiple IoT-based competitions, including Technoxian, where I secured a Bronze Medal for innovative project development and technical performance. • Actively exploring AI/ML concepts, tools, and frameworks to develop, analyze, and implement intelligent real-world solutions. • Designed and implemented project interfaces focused on improving user experience, accessibility, and responsive design • Represented my school as a state-level Table Tennis player, demonstrating strong dedication, discipline, and competitive performance in sports.		
EDUCATION		
• Pursuing B.Tech in Computer Science and Engineering from Ramdeobaba University, Nagpur (Maharashtra)	August 2024 - 2028	
• Completed Class 12 from Vidya Sanskar Public School, MIRZAPUR (Uttar Pradesh)	April 2022 - April 2023	
EXPERIENCE AND PROJECT		
• Developed and managed a website for the E-Cell of Ramdeobaba University, contributing to web design, functionality, and user experience • Worked on multiple projects related to Web Development, AI, and IoT, gaining practical experience in designing and implementing real-world solutions. • Designed a Zomato-inspired website prototype using Figma with a focus on UI/UX principles and responsive user interface design • Currently working on an AI/ML-based project focused on developing next-generation intelligent solutions and enhancing practical knowledge in emerging technologies. • Created and customized websites using WordPress and modern web development tools to build responsive and user-friendly platforms		
INTERNSHIPS		
Website Developer • Developed and modified the website using HTML, CSS, JS, BOOTSTRAP, NODE.	MITTAL INDUSTRIES, REMOTE	March 2026 - June 2026
Website developer • Developed a website from scratch using wordpress platform .	E-CELL., NAGPUR	April 2025 – June 2026
Website Developer and Analyst • Developed and managed a website and did the analyst of the data records.	MECHHELP., NAGPUR	January 2025 – April 2025
Extracurricular Activities		
• Active member of the Entrepreneurship Cell (E-Cell)	• Member of the National Service Scheme (NSS)	
• Part of the Robotics and Aviation Club (RAC)	• Founded and managed a startup named CrystalClean	
SKILLS & TOOLS		
• Leadership & Communication • Frontend Developer • Python, Java • SQL, Looker Studio, and Power BI for Data Analytics	• Problem-Solving & Critical Thinking • Product Strategy & Roadmap Planning • MS Office • Business Intelligence & Data-Driven Decision Making	• Time Management & Decision-Making • Data Analytics & Visualization • Feature Prioritization & Requirement Gathering • Generative AI (Gen AI) Applications in Product & Data
ACIEVEMENTS		
• Participated in national-level hackathons including Smart India Hackathon, showcasing innovation, teamwork, and problem-solving abilities. • Achieved a Bronze Medal at Technoxian 2025 for outstanding performance and innovative IoT-based project development. • Developed, presented, and implemented multiple technical projects in hackathons and competitions focused on AI, IoT, and web development • Collaborated, analyzed, and solved real-world technical challenges through innovative and research-oriented project approaches.
